PROFESSIONAL SUMMARY

Driven Software Developer and DevOps Engineer with hands-on experience in full-stack web development, containerization, cloud infrastructure automation, and Linux administration. Passionate about building user-friendly, responsive web applications. Experienced in React, JavaScript, HTML/CSS, Next.js, Tailwind CSS, and Supabase, alongside infrastructure provisioning using Terraform, AWS, Docker, and Shell Scripting.

WORK EXPERIENCE & PUBLIC HEALTH PROGRAMME ACTIVITIES

Technical Assistant (Aba South LGA) | Malaria Consortium | 2026

- Conducted operational microplanning, field data verification, and technical support across Aba South LGA for the ITN mass distribution campaign.
- Coordinated data compilation, daily tracking logs, and reporting to support public health intervention objectives.
- Participated in IMSV supportive supervision in Aba South for the Abia State Malaria Elimination Programme (2026).

HMIS & LMIS Data Triangulation — Abia State IMPACT Project | 2025 & 2026

- Participated in HMIS and LMIS data triangulation activities for the Abia State IMPACT Project in 2025 and 2026.

Facilitator | J-Click Smart Tech Ltd | Current

- Lead technical facilitation, guiding students and developers through modern software development, web frameworks, and digital technology concepts.
- Deliver structured hands-on sessions on web development fundamentals, software tools, and best engineering practices.

DevOps Engineer Intern | QurateHQ — ThriveAbia Technopreneurship Program | Completed Oct 2026

- Participated in the ThriveAbia Technopreneurship initiative implemented by QurateHQ, focusing on digital workforce development and cloud engineering workflows.
- Used Docker containerization, Git version control, and Linux systems administration to support deployment workflows and codebase stability.

Software Engineer / Technical Specialist | Mercor | Not specified

- Managed remote technical workflows, platform integrations, and codebase optimizations.

FEATURED PROJECTS

AgroLink — B2B Agricultural Marketplace Platform

- Developed a responsive web application connecting farmers, buyers, and logistics drivers with product search and inventory management. Configured backend database schemas and Supabase Row-Level Security (RLS) policies for role-based data access.

SAMBLESS Rental Enterprises — Event Equipment Portal & Calculator

- Designed, built, and deployed an event equipment rental web application with dynamic price calculators and automated WhatsApp booking integration.

aba-craft — E-Commerce & Vendor Escrow Workflow

- Developed front-end features and payment component flows for the aba-craft web application using Next.js and Tailwind CSS.

DevOps & Infrastructure Projects — Bash & Terraform Automation

- Authored Bash scripts to automate user account provisioning, temporary passwords, and logging; wrote Terraform HCL to automate AWS cloud resource provisioning.

CORE COMPETENCIES & TECHNICAL SKILLS

Frontend & Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Responsive Web Design

DevOps & Cloud: AWS, Terraform, Docker, Linux, Git/GitHub, CI/CD, Shell Scripting, Networking

Public Health Data & Programme Support: IMSV supportive supervision, HMIS & LMIS data triangulation, field data verification, operational microplanning, data compilation and reporting
